Full Stack Developer with a passion for content creation, user experience, and building applications. I discovered web development while studying Journalism and creating multi-media packages for feature stories. After becoming immersed in coding as a content developer for an analytics startup, I decided to expand my skill set through The Flatiron School. I'm excited to code, collaborate, and learn while helping tech companies evolve.

EXPERIENCE

ChefMod, LLC, New York, NY

Software Engineer (Contractor), December 2019 - present

- + Revitalize Vendor Portal UI utilizing Angular and Typescript to improve functionality and user experience
- + Working with client API to implement security services for login and user data components
